Description

Basic information about the drug BDENZA Description BDENZA Order, delivery and payment «BDENZA»?

### Buy BDENZA

BDENZA is an Indian-made anticancer agent aimed at fighting advanced prostate cancer. BDENZA XTANDI contains enzalutamide. The drug is prescribed exclusively by a doctor on an individual basis.

### The cost of the drug BDENZA

Our online pharmacy works directly with manufacturers, which is why we offer medicines at a more affordable price. All drugs are licensed.

### Reviews of the drug BDENZA

The drug has passed clinical trials, as a result of which the effectiveness of the drug has been proven. In addition, the patients themselves leave positive reviews about the drug. Unfortunately, the number of cancer patients is growing every day, so it is necessary to choose high-quality and effective drugs, including BDENZA.

### How does BDENZA work?

The drug is effective against prostate cancer. Enzalutamide tablets block the use of sex hormones. As a result, the amount of androgens decreases, the tumor becomes smaller, therefore, the development of cancer slows down.

### Features of the use of the drug BDENZA (Enzalutamide)

The medicine is recommended to be taken every day at the same time with a dosage of 160 mg. It is necessary to strictly adhere to the doctor's prescriptions, it is not recommended to independently make a decision to increase the dosage of the medication. Usually the course of treatment is quite long. At the beginning of the course of treatment, one should refrain from planning pregnancy in order to avoid fetal development disorders for a period of 3 to 6 months.

### Results of therapy with BDENZA

BDENZA is one of the most effective cancer-fighting drugs approved back in 2012. The drug has passed many clinical trials, as a result of which its high efficiency has been proven. According to the latest data, the drug can reduce the risk of death by about 40%, and the risk of disease progression by 80%.

### Side effects and contraindications of BDENZA

The drug is contraindicated in children and persons with an individual intolerance to the components of the drug. Also, the drug is not recommended for use by persons suffering from epilepsy, TBI, stroke attacks, brain tumor, seizures. The most common side effects are fatigue, swelling, and joint pain.
