Buy Hepakast (L-Leucine, L-Isoleucine, L-Valine)

The three-component drug Hepakast from the Indian brand "Aprazer Health Care" is designed to replenish amino acids in the body that are not produced by the body. The composition of the drug contains leucine, isoleucine and valine, which have an effect on the growth of muscle mass, help to assimilate proteins and unload the liver during these processes. You can buy Hepakast on our website.

Hepakast Price

The amino acids that make up Hepakast release energy directly in the muscle fibers, performing the function of muscle "fuel", acting throughout the entire period of use. Under the influence of physical exertion, muscles consume branched-chain amino acids. So the recovery process also

comes down to replenishing the reserves of leucine, isoleucine and valine in muscle tissues. The peculiarity of Hepakast is that it allows you to replenish amino acids in the body quickly and in the required amount, avoiding the stress of other organs, as it would be when obtaining the necessary amino acids from food. The cost of Hepakast allows it to be used in everyday life without a significant blow to the wallet, since the production of the drug takes place according to a well-known and proven technology.

Reviews of Hepakast (leucine, isoleucine, valine)

Hepakast is produced in one of the largest pharmaceutical factories in Asia, at the Natco factory, which is rented by the Aprazer Health Care brand. This guarantees the high quality of the product, its safety and effectiveness. According to those who have already used Hepakast, it is easy to use thanks to the filling in portioned bags and is effective from the first use. The use of Hepakast allows you to start gaining muscle mass from the very first dose of the drug.

Hepakast is a three-component active supplement for replenishing amino acids in the body that affect muscle growth. Hepakast allows you to get leucine, isoleucine and valine directly from food, which allows you to adjust the diet that is most suitable for training.

Release form

BCAA Hepakast is available in powder form, packed in separate sachets. Each sachet contains 10 mg of amino acids - the optimal dose for a single dose. Each package of Hepakast contains 10 bags of amino acids. The packaging is equipped with branded holograms and data on the date of manufacture and expiration date of the additive.

Indications and contraindications

BCAA preparations are among the most popular in the world of professional bodybuilding and those sports that require fast, reliable and safe muscle gain. That is why many professional trainers recommend their wards to use Hepakast during active training. It is not recommended to use Hepakast in case of individual intolerance to the components of the drug, during pregnancy, lactation and persons under 18 years of age. If you experience any unpleasant symptoms after taking the supplement, you should contact your doctor.
