Iklusig: price

The cost of the drug with us is affordable for most of our clients, since we work directly with suppliers and are interested in ensuring that people suffering from cancer receive drugs on time and at an affordable price.

Iclusig Reviews

Oncologists and patients speak well of the action of Iclusig tablets, noting positive dynamics already a few weeks after the start of taking the medication.

An active antitumor agent that inhibits the development of protein kinase - a protein structure that stimulates the growth of cancer cells with the expression of the Philadelphia chromosome. Clinical trials have shown a high level of efficacy of Iklusiga even in those patients whose treatment before its use did not bring positive results. During therapy, the number of abnormal cells becomes much smaller, and the disease enters a state of permanent remission.

Description of Iclusig medicine

The form of release of the drug is coated tablets, biconvex, dosage 15 mg (60 tablets) and 45 mg (in a package of 30 or 60 pieces). The starting dose is 45 mg, and you need to swallow them whole, without biting through. The treatment regimen should be determined only by the attending oncologist with constant monitoring of the results of therapy.

Iclusig: indications for use

Rare forms of blood cancer and oncological processes in the bone marrow. First of all, these are chronic myeloid leukemia and acute lymphoblastic leukemia.
