Description

Basic information about the drug Lenalid 25 mg Description Lenalid 25 mg Order, delivery and payment Lenalid 25 mg

LENALID 25 mg (LENALID 25 mg)

This drug is manufactured in India by a well-known pharmaceutical company. This company specializes in the production of drugs for cancer and Hepatitis C.

Order LENALID 25 mg

In our on-line pharmacy, you can buy this drug at an attractive price. The pharmacy works directly with drug manufacturers, so the final cost of drugs is obtained without unnecessary markups and overpayments.

The advantages of our online pharmacy include the availability of all the necessary certificates and other documents. These words are not an empty phrase - we put them together with the delivered medicines in the order so that the buyer can be sure that he is buying a really high-quality generic.

Indications for use of the drug LENALID 25 mg

LENALID 25 mg is produced in India and comes in 30 capsules per pack. The active ingredient in this medication is lenalidomide.

This drug is antitumor and immunomodulating. Accepted and dispensed strictly according to the doctor's prescription. It is prescribed for patients with mantle cell lymphoma, multiple myeloma, anemia in those dependent on blood transfusions.

The course of admission and the specificity of the use of LENALID 25 mg

The duration of the course and treatment as a whole is prescribed only by the attending physician and a doctor who is familiar with the results of all tests, including for possible allergic reactions, even not related to medicine. Usually, the course of taking this drug is 21 days with a 7-day break. LENALID 25 mg is taken strictly 1 capsule per day every day at the same time. If for some reason one capsule is missed, you cannot replace it with another substance.

Side effects

- Constipation;
- Rash;
- Diarrhea;
- Anemia;
- Muscle weakness;
- Convulsions.

If at least one of these symptoms occurs, you should immediately contact your doctor. Only he makes a decision to cancel the drug intake or to change its dosage up or down.

Also, only the attending physician can add drugs to the treatment that can be used simultaneously with LENALID 25 mg. The attending physician closely monitors the course of the patient's illness throughout the prescribed course of medication.

Contraindications

LENALID 25 mg is not recommended for use by pregnant and lactating women. Also a contraindication is children under 18 years of age.

Order

There are several ways to place an order in our online pharmacy. You can fill out a callback form, you can write to Viber, or you can fill out an application yourself. In any case, after leaving the application, the pharmacy operator will call back to clarify the details of the order, and he can also consult for free on the drugs ordered.

Payment

An online pharmacy is designed in such a way that the customer first receives the order and then pays. This is done so that the client can check the expiration date of the drugs, as well as whether the integrity of the sealed packaging and the drugs themselves is not violated. As soon as he is convinced that everything is in order, the buyer pays for the order.

Delivery

The online pharmacy supplies medicines throughout Russia and the CIS countries. In Moscow, St. Petersburg and Krasnodar, drugs will be delivered to the recipient of the order by courier no later than two days from the date of placing the order.

In other cities of Russia and the CIS countries, the delivery of drugs is carried out by means of the Russian Post and the courier delivery service EMS. If the delivery method indicates one of these points or both, then the delivery conditions to a specific point on the map must be clarified by phone with specialists.
