Description

Basic informationDescriptionOrder, delivery and payment

Tudofovir is an antiviral drug made in India. The manufacturer of the drug is the pharmaceutical company Aprazer. The formula according to which this drug was created is officially licensed and is perfect for both prophylactic and therapeutic purposes for patients suffering from HIV infection and chronic hepatitis B.

The active ingredient of Tudofovir is tenofovir disoproxil, which is a prodrug. After the drug is absorbed into the bloodstream, it is converted to tenofovir (in its pure form), which determines its persistent therapeutic effect.

The international name of the active ingredient is Tenofovir disoproxil.

Buy Tenofovir disoproxi

You can buy a medicine by ordering it on the official website of our pharmacy. Fill out an application by filling out a form indicating all contact information.

Tudofovir: price

The cost of the drug is affordable for each patient, since we are talking about an Indian generic. Its production costs the creators much less than the manufacture of original drugs, which are many times more expensive. At the same time, the quality of the drug is high, and its effectiveness is constantly confirmed by doctors who regularly prescribe Tudofovir to their patients.

Reviews

Patients with chronic hepatitis B and HIV-infected, who need constant and long-term treatment, respond positively to Tudofovir. They note a significant improvement in health status within 2-3 weeks after starting the medication.

It is a direct-acting antiretroviral drug. By inhibiting reverse transcriptase, it prevents the multiplication and development of HIV and the hepatitis B virus in the human body.

Often this medicine is used as part of a complex treatment, including it in already developed therapeutic regimens. The main thing is to take it only as directed by the attending physician, strictly observing the established dosage. All patients taking Tenofovir should stop drinking alcohol, smoking and drugs.

Description of the drug Tudofovir

It is released in the form of tablets, which are covered with a light blue film. The tablets are convex on both sides, inside they are white. The amount of active ingredient in each of them is 300 mg.

Tudofovir: indications for use

The main indications for use are HIV infection and chronic hepatitis B. Tudofovir is taken daily, 1 tablet. In this case, the time of eating does not matter. If necessary, the dose of the medication can be adjusted by the doctor.
